

Dickson Lo

Web3 Product Manager | CEX & Trading Systems | Wallet & NFT Products

Product manager with 10 years of experience, most recently focused on Web3 trading products, CEX platform architecture, quantitative-trading tools, fiat on/off-ramps, C2C/P2P, wallet and NFT flows, and AI/LLM-driven product development. Led a five-person product and design team to launch a 0-to-1 exchange platform within four months, and designed complex systems including a Triple-Ledger asset architecture, multi-level approval flows, a community rebate engine, a Futures Grid Trading Bot, FX pricing with oracle protection, and smart routing.

Core Competencies

CEX & Trading Products	Centralized exchanges, futures grids, trading UX, order lifecycle, margin and liquidation logic
Asset & Risk Architecture	Triple-Ledger, wallet matrix, reconciliation, approval flows, risk controls, account security
Fiat & Crypto Infrastructure	C2C/P2P, fiat on/off-ramps, Quick Trade, FX aggregation, oracle protection, smart routing
Wallet & NFT Products	WalletConnect, EIP-712, NFT transfers, Web2/Web3 game assets, non-custodial flows
Product Delivery	0-to-1 launches, PRD/FRD/BRD, technical pre-review, modular requirements, cross-region delivery
AI Product Workflows	Agentic workflows, prompt engineering, IR mapping, design-to-code prototype automation

Professional Experience

Xchanger Co., Ltd. (Gamania Group subsidiary) - Web Product Manager

Web3 / Gaming / NFT / AI Workflow Automation | Jul 2025 - Jun 2026 | Taipei

- Led product planning for the Xchanger NFT platform, integrating WalletConnect and EIP-712 signing and designing NFT transfers between games across Web2 and Web3.
- Defined on-chain/off-chain asset reconciliation and multi-source data-consistency monitoring to improve the security and transparency of non-custodial withdrawals.
- Independently built an Agentic Workflow product automation engine, decomposing PM, UI/UX, front-end, and Figma responsibilities into collaborative AI workflows that accelerated Web3 product iteration from requirements to prototype.
- Defined IR mapping and DS Dictionary constraints to reduce LLM hallucinations and align AI-generated UI/prototypes with engineering semantics and standards.

Asia Pacific Manyu Technology - Product Manager to Product Lead

CEX: Fameex / TopOne | Digital Asset Trading | Product Team Lead | Jul 2022 - Jul 2025 | Taipei

- Promoted from Product Manager to Product Lead, leading a five-person product and design team responsible for the Fameex / TopOne CEX ecosystem.
- Delivered a 0-to-1 CEX launch within four months, defining trading infrastructure, wallet/account architecture, approval flows, a rebate engine, fiat/crypto routing, and risk-control systems.
- Led modular PRD design and a technical pre-review process, achieving 100% requirement componentization and 80% complex-logic alignment to reduce development blockers and improve cross-team delivery efficiency.
- Designed a Triple-Ledger asset architecture and one-to-six-level dynamic approval flows spanning user funding, trading, commission, and platform-side accounts, along with large-withdrawal and critical-configuration change controls.
- Led end-to-end Web/App design of a Futures Grid Trading Bot supporting neutral, long, and short strategies; arithmetic/geometric grids; estimated liquidation price; minimum initial margin; order splitting; FILO matching; and ROI/APY calculations.
- Designed fiat on/off-ramp, C2C/P2P, and Quick Trade flows with FX aggregation, +/-3% median-deviation protection, liquidity-priority smart routing, IP/device blocking, and cancellation-risk controls.
- Re-architected the exchange admin system into modular coin, asset, and deposit/withdrawal configuration components, and established 30-minute on-chain wallet snapshots and asset-reconciliation logic.

Narrow Pacific - Product Manager

Crypto Investment / Account & Wallet Flows | Hash Card | 2021 - 2022

- Conducted market research and user interviews, leading App/Web flow planning and prototype design.
- Designed the Hash Card crypto product flow across landing, product listing, checkout, order confirmation, payment success/failure, account dashboard, wallet, settings, messages, and referral flows.

INNO-OZ - Product / Project Manager

Client Projects | E-commerce / Social / IoT / Internal Tools | 2016 - 2021

- Led five to six client projects from planning through launch across e-commerce tools, social media, industry internal tools, IoT tools, and end-user apps.
- Produced FRDs, use cases, wireframes, prototypes, flowcharts, competitive product analyses, issue tracking, Kanban boards, mind maps, and Gantt charts.
- Standardized API documentation workflows to improve development collaboration and establish a delivery foundation for later complex financial and Web3 systems.

Selected Projects

Asia Pacific Manyu CEX - Fameex / TopOne

Designed an agent- and community-driven CEX system covering a wallet matrix, USDT valuation engine, real-time asset snapshots, multi-level approval flows, community rebate settlement, Quick Trade matching, and risk monitoring.

CEX, Asset Ledger, Risk Control, 0-to-1

Perpetual Futures Grid Trading System

Designed a futures grid trading bot supporting neutral, long, and short strategies, with liquidation-price, initial-margin, order-splitting, FILO-matching, per-grid ROI, and APY calculation logic.

Derivatives, Grid Bot, Margin Engine, Trading UX

Fiat / Crypto FX Platform

Built C2C/P2P, Quick Trade, and third-party liquidity-aggregation flows integrating data sources including Binance, OKX, KuCoin, and Yahoo, with dynamic weighting, median-deviation filtering, and smart routing.

On-ramp, P2P, Oracle Protection, Smart Routing

Xchanger NFT Platform

Planned the NFT platform and Web3 wallet flows, integrating WalletConnect and EIP-712 signing and designing NFT transfers between games across Web2/Web3, seller onboarding, collection optimization, and non-custodial reconciliation.

NFT, WalletConnect, EIP-712, Reconciliation

Hash Card

Designed a 33-page crypto hashpower product prototype covering product discovery, checkout, order confirmation, payment success/failure, account dashboard, wallet, spot/futures wallets, and referral flows.

Crypto Product, Wallet, Checkout, Referral

AI Agent Product Development Workflow

Introduced AI agents at Xchanger Co., Ltd. to reshape product development, converting business requirements into PRDs, wireframes, semantic mappings, and high-fidelity prototypes to accelerate Web3 product validation.

LLM, Prompt Engineering, IR Mapping, Design-to-Code

Portfolio

- Futures Grid Trading Bot PRD & Wireframe: [Axure Prototype](#)
- Fiat / Crypto FX App Wireframe: [Axure Prototype](#)
- Fiat / Crypto FX Admin System: [Axure Prototype](#)
- Hash Card: [Portfolio](#)
- Fameex: [Official Website](#)
- AI Agent Product Development Workflow: [Login / Registration Prototype](#), [CEX x AI Landing Page](#)
- Xchanger NFT Platform Feature Prototypes: [Become-a-Seller Concept](#), [Collection Optimization Prototype](#)
